Art Unit: 3653

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2 through 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, it is not understood how the positioning device causes the absorption block to absorb the sheet as recited. Insufficient structure has been recited to perform the stated function.

In claim 3 lines 3-4, the language "the circumferential surface" lacks antecedent basis.

In claim 3 lines 6-9, it is not understood how the recited function is performed as it appears insufficient structure has been recited in order to perform the stated function.

It is not understood how the function of claim 4 is performed as insufficient structure has been recited.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 through 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Derc et al.

Art Unit: 3653

Note the take-out rotor 4 and the positioning device 6. See column 1 line 59 through column 2 line 23.

5. Claim 4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. Claims 5 through 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David H Bollinger whose telephone number is 703-308-1113. The examiner can normally be reached on Monday through Friday from 9:00 am to 5:00 pm.
